

I do not have access to the Azure Account so I perform all the tasks in AWS

Task 1 (make user and give administration access to the user)

Google Chrome isn't your default browser [Set as default](#)

aws Services Search [Alt+S]

IAM EC2

Specify user details

Step 2
Set permissions

Step 3
Review and create

Step 4
Retrieve password

User details

User name

bminfotrade

The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)

☒ Provide user access to the AWS Management Console - *optional*
If you're providing console access to a person, it's a [best practice](#) to manage their access in IAM Identity Center.

Are you providing console access to a person?

User type

☐ Specify a user in Identity Center - Recommended
We recommend that you use Identity Center to provide console access to a person. With Identity Center, you can centrally manage user access to their AWS accounts and cloud applications.

Are you providing console access to a person?

User type

☐ Specify a user in Identity Center - Recommended
We recommend that you use Identity Center to provide console access to a person. With Identity Center, you can centrally manage user access to their AWS accounts and cloud applications.

☒ I want to create an IAM user
We recommend that you create IAM users only if you need to enable programmatic access through access keys, service-specific credentials for AWS CodeCommit or Amazon Keyspaces, or a backup credential for emergency account access.

Console password

☐ Autogenerated password
You can view the password after you create the user.

☒ Custom password

Basically here I step by step create a user and give the permission to AdministratorAccess and then by using the account id , username and password I can open the user account , here I have all the acces to make another user and delete any user...

Task 2 (Active Directory on Microsoft and Create Users and implement multi-factor authentication (MFA) on users.)

Task 3

Microsoft 365 platform , licence , service

Features of Microsoft 365

- **Collaboration and Communication:** Microsoft Teams, SharePoint, and Yammer enable effective collaboration and communication within and outside the organization.
- **Productivity and Office Applications:** Core applications like Word, Excel, PowerPoint, and Outlook help users perform day-to-day tasks efficiently.
- **Cloud Storage and File Sharing:** OneDrive and SharePoint provide robust cloud storage and file-sharing capabilities.
- **Security and Compliance:** Advanced security features and compliance tools help protect data and meet regulatory requirements.
- **Mobility:** Access to applications and data from anywhere, on any device.

Microsoft O365 Licenses

1. Microsoft 365 Business Plans:

- **Microsoft 365 Business Basic:** Includes web and mobile versions of Office apps, email, and Teams.

Microsoft 365 Business Standard: Includes desktop, web, and mobile versions of Office apps, email, and Teams.

Microsoft 365 Business Premium: Includes all features of Business Standard plus advanced security and device management.

Microsoft 365 Apps for Business: Includes desktop, web, and mobile versions of Office apps but does not include email or Teams.

2 Microsoft 365 Enterprise Plans:

- **Microsoft 365 E1:** Includes web and mobile versions of Office apps, email, and Teams, with basic security and compliance features.
- **Microsoft 365 E3:** Includes all features of E1 plus desktop versions of Office apps, advanced security, and compliance features.
- **Microsoft 365 E5:** Includes all features of E3 plus advanced security, analytics, and voice capabilities.

Microsoft 365 Education Plans:

- **Office 365 A1:** Free plan for educational institutions that includes web and mobile versions of Office apps and email.

- **Office 365 A3:** Includes all features of A1 plus desktop versions of Office apps and additional security and compliance tools.
- **Office 365 A5:** Includes all features of A3 plus advanced security, analytics, and voice capabilities.

Microsoft 365 for Government Plans:

- Tailored plans designed to meet the unique security and compliance needs of government organizations.

Service Options Available through Microsoft 365

- **Email and Calendar:**
- **Online Meetings and Collaboration:**
- **File Storage and Sharing**
- **Security and Compliance:**
- **Device Management:**
